Every Journey Starts with Your First Stitch.

The Expedition Innov-is BX1 combines sewing and embroidery in one machine, with speeds up to 850 stitches per minute, 774 built-in embroidery designs, and 754 built-in stitches and fonts. Featuring an expansive ~8" x 14" embroidery area, wireless connectivity, and innovative features like industry-first Curve Sewing and an External Laser Guideline Marker, it delivers enhanced precision and creative flexibility. Seamlessly connect with Artspira, My Stitch Monitor, and Design Database Transfer to create, transfer, and monitor designs with ease. Built for makers of every skill level, wherever creativity takes you.

Precision Sewing Features

Curve Sewing

Reduced pressure with the needle down allows easy fabric rotation for smooth curves, while normal pressure resumes as the needle lifts for consistent, even feeding.

External Laser Guideline Marker

Projects an adjustable laser guide for straight sewing or precise edge stitching. Compatible with both straight and decorative stitches.

Optional Intelligent Stitch Regulator

Automatically adjusts needle timing for even stitch lengths, with Continuous, Intermittent, and Basting modes, plus Regular, Open-Toe, and Echo free-motion feet. Sold separately.

Stitch Tapering

Automatically widens or narrows stitches at the start or end of seams for clean, polished decorative finishes.

Digital Dual Feed Foot

Ensures smooth, even fabric feeding with a belt-driven system for more consistent results across challenging materials.

High-Quality Embroidery

Large Embroidery Area

Create larger, more intricate designs with an ~8" x 14" embroidery area, including both ~5" x 7" and ~8" x 14" frames.

Matrix Copy

Easily duplicate and arrange designs. Create customized patterns or maximize the number of designs stitched within a single hoop.

Creative Yarn Couching

Add dimension and texture with yarn to create bold 3D lettering and unique decorative designs.

Stitch-to-Block

Automatically add or remove stitches when scaling designs up or down to maintain quality and detail.

2-Point Positioning with LED Pointer

Align designs accurately using two reference points, even with imperfect hooping.

Enhanced Bobbin Winding

Wind bobbins easily with a thread cutter and dedicated spool pin, without interrupting setup.
